In May 2016, Dailymotion brought together its streaming and VOD platforms to a single offering dubbed Dailymotion.com. Dailymotion provides its services in more than 60 countries, and it is available in English, German, and Spanish as well as in French, Italian, Dutch, Finnish, Spanish, Portuguese, Danish, Swedish, Norwegian, Brazilian, Czech, Hungarian, Hebrew, Polish, Russian, Korean, Taiwanese, Thai, Filipino and Malaysian. From its original one-screen interface to its revamped three-screen system that lets users track their favorites and create a queue, Dailymotion maintains a simplistic, modern, and straightforward design. The original layout was mainly made up of four main sections: the Filters, the Videos, the "My-Vids" collection of videos, and a Download section. Later, the "My Vids" section was retired, and the Videos section was filled with the "Now Playing" and "Instant Watch" lists that have been renamed "My List" and "My Queue." The My-Vids section was also amalgamated to a "My Favorites" and the "My Queue" section was divided into a "Top Rated" and "Top Searched" section. The user interface is now divided into three distinct panels: the Filters, the Videos, and the Channel. The Filters panel still contains the same icons as the earlier days, with the exception of the "My Favorites" and "My Queue" sections, which are now displayed as a new icon. On the other hand, the Videos and Channel panels are rearranged to contain all the "My List," "My Queue," and "My Favorites" sections as well as the "Top Rated" and "Top Searched" options. Dailymotion offers over 40 channels on its platform, and those that are available for streaming are split between professional video channels and general ones. The former include the Discovery Channel, National Geographic, History Channel, Discovery Channel, National Geographic Channel, HGTV, Lifestyle Network, BET, MSN, and
