Security for Home Premium We have been a client of ESET for years. The software has provided us excellent virus detection and cleanup ESET NOD32 Ultra Security for Home Premium Review: #1: Anti-malware and anti-ransomware: This offering represents a very significant improvement in terms of its malware and ransomware detection and removal performance. A.V.M and the True Positive detection rate have both improved significantly. ESET includes an updated version of A.V.M, which

---

had a very good score in ESET's previous Anti-Malware evaluation. #2: More efficient and easier to use: Compared to the previous version, AVS is much more efficient and easier to use. It has a much simpler user interface, enabling the user to detect and remove virtually any kind of threat, without having to go through the usual long process of typical anti-malware software. #3: Ransomware detection has improved: The scan process is even faster than before. Additional features and speeds

---

have been added. #4: Advanced definitions and anti-fraud technologies: The advanced and unique prevention mechanisms in this version have been further enhanced, and the detection algorithms have been combined with ESET's anti-fraud technologies to provide superior protection against fake alerts generated by ESET's anti-fraud systems. #5: Improved deployment compatibility: The new version has been tested to work with servers running on 64-bit versions of Windows. #6:

---

More detailed activity logs: ESET is able to log every action made within its system, enabling users to determine exactly what happened during the virus or malware scan process. This not only makes it easier to diagnose problems, but also enables the user to generate threat reports with high accuracy. #7: Enhanced Google security: Google has now also been integrated into ESET's data collection process. The data received from Google is used to confirm whether the alert is valid or not. #8:

## What's New In?

It searches for AES-NI specific extensions in the drive and decrypts them all at once. ESET AES-NI decryptor Professional Edition Description: It checks in an update database if the chosen files are AES-NI encrypted. Let's take a look at the AES-NI decryptor features in more details. • AES-NI detection: The decryption program analyzes the AES-NI encryptions by identifying the AESNI registry keys and binary

---

files.

- Batch decryption: Up to 120 files can be decrypted in a single operation.
- Retrieving decrypted files: Once the infected file is found, the program proceeds to decrypt it automatically. You can wait until the process is finished or use ESET's process manager to terminate it directly.
- AES-NI encryption notification: The program warns you if a file is encrypted using AES-NI when you are decrypting a selected file.
- AES-NI info view: The program shows system-wide information about encrypted

---

files, such as the file extension and the name, encrypted by AES-NI. You can also see your total files and the amount of decrypted files.

- AES-NI setting: All AES-NI settings are defined in one location.
