The biggest and best roguelike game to come around since the golden age of the genre. It's compatible with Steam and GOG. What does it have? An immersive experience: A dynamic cast of characters whose death is not a permanent barrier to progression, but rather expands the "perspective" of the game - so that you can better understand and appreciate the roguelike experience. The perspective system allows you to change which character you play as at any point. Characters also come with a signature, which can dramatically alter the story and gameplay, so you can customize your own experience. Good balance: The game balances its time-honored roguelike rules - powerful characters and items, randomly generated dungeons, and permadeath - with modern design and game mechanics: plot developments, multiple endings, and a card-based "team" system that allows players to control their own team of characters. Story & World A modern and exciting story: While other roguelikes have a completely open-world structure (you can travel anywhere in any order - so you're never locked out of the story), Black Book features a scripted plot that will surprise you. Also check out the plot dev log! A different take on dungeon design: In Black Book, you aren't wandering the open world, but rather exploring pre-designed dungeons. Inside these dungeons you encounter traps and enemies, but you are never forced to "dodge" - you are always in control. When you encounter a trap that slows you down, you can retreat to the next checkpoint and return when you are ready. The traps will automatically clear themselves once you leave the dungeon. You can even traverse the dungeon in different ways at different times. A key mechanic: While other roguelikes have a permadeath system that permanently limits the amount of replayability, Black Book makes it so that you can play the same character again and again. Each character has a "perspective" that determines what new events and areas will be unlocked if you die. The perspective system allows you to play as any of the characters, even if you die, and then resume your "perspective" on that character. As you play, you will unlock more perspectives. If your perspective becomes full - you've unlocked all the perspectives - you can start a new game and choose a new character. Each character has unique abilities,

Online (AGO) is a GOL initiative to preserve and disseminate the land and tribal tradition of the Heññaya tribe of the eastern Mam watershed and the southern Tenam Puyan. AGO has published translations of several of the most important Heññaya written works, most notably Yemhe Ndek, the bestselling work of reference in the Heññaya's language. It is also supporting the production of young Heññaya writers and composers and publishing the complete works of twentieth-century Heññaya writers. Adelheid Barashi Adelheid Barashi has been called one of the most important living Argentine classical guitar musicians. The Carlos Guastavino Music Institute (INCAP), together with renowned Montevideo musicologist Andrés Zauli, noted that her "almost total virtuosity is matched by equally high artistry and profound concentration; a truly exceptional combination. Through her impeccable technique, she has mastered various facets of the Spanish and Latin American guitar. The way she interprets the virtuoso repertoire of the 19th century is unprecedented." Heññaya music is still not taught, and can be difficult to distinguish from that of other indigenous languages of the region. One prominent Heññayo composer within AGO, Nora Vazquez Rodriguez, has said that she tries to focus on sharing her Heññaya folk music with students and to attain parity in terms of access to resources. As one of the only living

Heññayo guitarists in Argentina, Barashi has performed internationally. She has also participated in several important collaborations in Latin America, including the works of María Eugenia Lavat. In addition, she has organized several symposiums and given the keynote addresses at various academic conferences relating to a topic of her personal interest, the early 20th century indigenous place names of Canelones Department and their music. For my latest work I was inspired by Grand Master Cader and created a cool action packed module based on a legendary Chinese myth and ancient artefact. The great legend of the Talons of Lo-Peng comes from ancient China, where it was first brought forward by one of the first great ancient kings. This king spoke of being asked to find the mystic Lo-Peng and the holy Talons of Lo-Peng. On his travels to find the mythical artefact, the King was captured by the Mongols and taken to their most holy shrine. There, in front of the most powerful shaman, the King was tied down and tortured. The Mongols needed information on where the artefact was hidden. But before they could get any answers the shaman cast a spell which gave them his magical powers. Finally freed the King was allowed to escape. But no one knows what happened to the King for the Mongols killed him shortly after. The King's brother, and leader of the Mongol Great Duk, however, was not happy. He wanted to claim the Talons, and he told his brother to go to the Mountains of Tibet to find what he was looking for. He also gave him two warriors, named Ma Zui and Ma Sun, to help him on his journey. The warriors were already very experienced, and because they had been trained in the forbidden arts of China. After finding the artefact the King made the strange request that the warriors be allowed to live, but it was secretly of course the King who would rule the land when he returned. Ma Sun and Ma Zui however had their own plans and asked the King for help when the time came. They secretly prepared themselves for the coming Mongols and their shaman overlord, after they had searched for the warriors. The time came when the warriors found out where the artefact was hidden. And by a strange chance it was a Chinese monk who was sent to observe the two warriors. The monk was actually part of the larger group which had attacked the warriors in China. Wounded, they fled to the mountains of Tibet and hid in a cave. There they were captured by a group of Tibetan elite warriors whose army was sent by the Mongol shaman. During their trial, the warriors revealed themselves as Ma Zui and Ma Sun. After explaining to the leader of the warriors that he had not come to harm them, they were allowed to live. They were then put in prison and escorted to their new home. Fast forward
