Lost in Vivo is a short game that takes place in the claustrophobic confines of a sewer tunnel. Based on the source material of the short novel of the same name by Debra Donovan, it uses a melee combat system that allows the player to step on and smash through obstacles to confront enemies. There are no weapons that work in this game, you will need to confront the hostile environment head on. This is unlike other games that can have weapons to help you and sometimes make the confrontation easier. In this game you will meet characters who deal with a mental disorder that causes them to fear the ground and their surroundings. An environment that cannot be trusted. The PC version of the game will support both controllers and keyboard/mouse control. There are no plans at this time for a Linux port but I have a reputation to uphold for the next game if it does not work I will issue refunds on Linux orders. This game's story is not complete but it was released with most of the intended content of the final version. As a bonus, you get to see a colorized sketch of the final cut of the game in the game description. System requirements: Windows XP or higher Linux. Please contact me for more information if you are interested in the Linux version. Sound Card with support for 5.1 surround sound and at least 4 channels 16 GB of free hard drive space Memory of 2 GB or higher (8 GB recommended) A graphics card with at least 32 MB of video RAM (64 MB recommended) Windows 7 or higher Minimum of Windows Vista 8 GB RAM 32-bit CPU or

64-bit CPU with PAE 2 GB RAM AMD Phenom II X4 955 Black Edition or Intel Core i7-3820 4 GB RAM AMD Phenom II X4 955 Black Edition or Intel Core i7-3820 8 GB RAM What a developer says about it: Future plans for Lost in Vivo The game is available in both the Android and iOS stores right now. The only reason I am not releasing a PC version is there is no direct client for Steam and Steam is not yet accepting paid apps. That being said it is possible but I have no plans to release on Steam at this time as there is no particular reason to need a client. I do plan to release an iPad version in the near future though I am not going to wait for you guys to buy it. If you want to buy

Gunslinging is a shooter game that takes you through ultimate gunfights across various locations of the Wild West. Each level is a new fight against the Quicksilver Bandits, who have set up their law in the sleepy town of Sunset Bluff. Draw your weapon and save the innocent citizens! Hone your shooting skill and position yourself in the best possible position to shoot the bandits before they can shoot you first. As the fight begins, you will be given three lives and need to shoot the bandits in order to win the level. However, it gets tougher when you play in "Rage Mode" where you have infinite lives and can rack up the points to achieve the high scores. Each level comes with five levels, which each one having their own boss and the bosses come with their own unique loadouts and special abilities, so the gameplay is as dynamic as the bandits themselves. Once your legendary gunfight is over, you can unlock the high scores of the previous levels for high scores and bragging rights. The game features five game modes - Town Square, Railway Station, Gold Mine,

Outskirts and the Old Canyon, Old school, upgradeable weapons and unlockable Charms, Immersive toon shaded graphics with ultra smooth framerate and rage mode. Unlock the high scores and unlock the Charms to boost your challenge and enhance your gameplay. Our official Facebook page Gunsmith WEBSITE - "Western 1849 Reloaded" : Gunsmith App: My first video! ?This is a game I've been thinking about making for a long time. Looking back at games with unrealistic controls can be frustrating sometimes. So in this video I made a game in which you need to beat the boss in about 5 minutes. You need to dodge bullets and deal a lot of damage! So, make sure to use your actions and wait a moment before pressing the button to fire again. Good luck! ? Play the original game here: Play through the game controls:

What's new:

The Zombies are coming! What's happening for America! Zombies in the street! We are now officially in the Modern Zombie Era like it or not - and like it or not we're all either going to be Zombies or Captives. As demonstrated with the ongoing Zombie movie genre, it's not if - it's when. It's a bitch-boom. Not many people will escape the zombie apocalypse. The widespread corrupt politics that has infected America will cause it to fall, eventually. The Zombie's virus will spread - and the greatest damage will be done to those who are unwilling to stand - or those who decide they aren't going to take the rationed portions of human flesh and blood. I can't think of many decisions that will have more terrible consequences to humanity. I know what you're thinking. It's not a definition of what a Zombie would be for you - it's an instant hit list of what might be the defining characteristics of a Zombie - a.k.a. Zombie Nation. And after examination I have to say I like this definition a lot better than the typical one that comes up. Here's my version of a Zombie Nation - neither better nor worse than any others - but it is a bit original, and probably a bit different. You might disagree. The following list, while by no means comprehensive, represents some of the more common elements expected of a full-blown Zombie Nation. It is neither comprehensive nor definitive. Feel free to make your own list of things that make a Zombie Nation, and tell me what you think is missing from the list. I don't know that we'll have leaders

and politicians any more who are truly anything like Obama. Certain ZMns are going to show up - they are even planning their own four year term - and soon they and their Zombie/Captive bosses will find that they don't know the extent of the power they are now called upon to wield - and they will make decisions that will leave the world a much worse place than they found it. The Zombie Apocalypse will come about because of a
